

Winter Blues

A little colouring book of climate mindfulness

Clare Bryden

Colour in the maps, and think about what the future holds for our weather under climate change

Clare Bryden is an artist, writer and website developer based in Exeter. Her interests are primarily in how human beings affect and are affected by the natural world of which we are part. www.cbryden.me.uk

This booklet is one of a series under the umbrella of "Gaming the Climate", a project continuing to highlight climate change. Look out for Middle Course, Worst Case, Summertime, and Grandchildren.

Data are © UK Climate Projections 2009, available without charge at ukclimateprojections.metoffice.gov.uk, taking central estimate for the 2050s under the medium emissions scenario. Changes are relative to 1961-90.

Thank you to Rachel for her original suggestion, and Kaleider for providing the creative space for conversations that gave the impetus to get on with it.
